Bulletin No: 136
Release Date: 16 June 2011
Region: Global

IP500 Digital Station 30A – Expansion Module Software

This Technical Bulletin is to advise customers of a new Release 7 binary file for the IP500 Digital Station “A” Expansion Modules. The new binary file, 9.0(1201) resolves an issue with noise when using a “M” or “T” series telephone connected to port 18 of a DS30A Expansion Module. Avaya recommends that customers experiencing this issue upgrade DS30A Expansion Modules to the 9.0(1201) software.

The binary file can be found in the IP Office 7.0 download section of the Avaya Support Web site:
