## General Availability (GA) - IP Office Release 8.1 Service Pack 6

Avaya is pleased to announce the availability of the sixth Service Pack for IP Office Release 8.1 software. This is a scheduled Service Pack addressing a number of field issues found in the IP Office 8.1 GA releases.

## 1 Overview

IP Office Release 8.1 Service Pack 6 incorporates new software for:

IP Office Core Switch 8.1(73)
Preferred Edition 8.1(9302) (also known as VoiceMail Pro)
Customer Call Reporter 8.1.42.6
one-X Portal 8.1.94(60)
IP Office Application Server 8.1.23(4)
IP Office Unified Communications Module 8.1.99(2)
IP Office Server Edition 8.1.99.4
Windows Flare Experience 1.1.3.14
User CD 4.2(53)

The IP Office Administration and application software can be downloaded from the Avaya Support Website:

## http://support.avaya.com

This software is for use with the IP Office IP500, IP500v2 and Server Edition Systems.

IP Office Administration consists of the following software:

Delivered Software or Package	Version
IP Office Firmware	8.1.73
IP Office Manager	10.1.73
System Monitor	10.1.73
Upgrade Wizard	10.1.73
Network Viewer	10.1.73
SSA Viewer	8.1.73
4610SW, 4620SW, 4621SW, 5610SW, 5620SW, 5621SW	2.9.1
4601, 4602 Telephone Firmware	2.3

Delivered Software or Package	Version
4601+, 4602+, 5601+ and 5602+ Telephone Firmware	2.9.1
4625 Telephone Firmware	2.9.1
5601, 5602 Telephone Firmware	2.3
2410 / 2420 Telephone Firmware	R6.0
5410 / 5420 Telephone Firmware	R6.0
1403 Telephone Firmware	R6
1408 / 1416 Telephone Firmware	R32
1408 / 1416 Loader (Boot File) Firmware	25
9504 / 9508 Telephone Firmware	R45
9504 / 9508 Loader (Boot File) Firmware	R15
IP Office Video Softphone (Windows)	3.2.3.48.67009
• ' '	3204bk.66292
IP Office Video Softphone (Mac)	
IP DECT - ADMM Firmware	1.1.13
IP DECT – ADMM Java Configuration	1.1.13
IP DECT – ADMM DECT Monitor	1.4
3701 Telephone Firmware	22.04.04
3711 Telephone Firmware	91.24.31.04
3711 Global Telephone Firmware	91.24.36
3711 Global Telephone USB driver	0.8
T3 IP Telephone Firmware	T247
T3 IP Admin Tool	3.08
1603, 1608, 1616 Telephone Firmware	1.330D
1603 Loader (Boot File) Firmware	1.330D
1616 Button Module Firmware	1.1.0
9620 / 9630 / 9640 / 9650 Boot Code	3.2.0
9620 / 9630 / 9640 / 9650 Telephone Firmware	3.2.0
9621 / 9641 Telephone Firmware (Application file)	6.2.2.09U_V452
9608 / 9611 Telephone Firmware (Application file)	6.2.2.09U_V452
9608 / 9611 / 9621 / 9641 Kernel	V13r50
1120E 1140E 1220 1230 Telephone Firmware	04.03.12.00
3720 Telephone Firmware	3.3.16
3725 Telephone Firmware	3.3.16
3740 Telephone Firmware	3.2.15
3749 Telephone Firmware	3.2.15
DECT R4 – IPBS 1 and IPBS 2 Firmware	5.0.11
DECT R4 - IPBL (DECT Gateway) Firmware	5.0.11
DECT R4 - GRBS (ISDN RFP) Firmware	R5C 3/40
DECT R4 – AIWS Firmware	2.73
DECT R4 – AIWS2 Firmware	3.13
DECT R4 – WinPDM	3.8.2
DECT R4 – Rack Charger Firmware	1.4.1
DECT R4 – Advanced Charger Firmware	1.4.1
DECT D100 – BS_MS Firmware	0.9.6
DECT D100 – BS_SL Firmware	0.9.6
3641 / 3645 Telephone Firmware	117.056
Avaya Voice Priority Processor (AVPP) Firmware	17x.039
Handset Administration Tool (HAT)	2.8.22.0

Component	Version
Soft Console	4.2(33)
TAPI2	1.0.0.38
TAPI3	1.0.0.38
Dev Link	1.0.0.5
TAPI Wave Driver (Windows XP)	2.0.0.0
TAPI Wave Driver (Vista/Windows 7)	3.0.0.0

**Note:** Support for Phone Manager ended in March 2013. This application is no longer included with the User CD.

Note: Upgrading IP DECT 3711 Telephone Firmware to 91.24.31.04

This Administration CD contains two upgrade programs with this release of 3711 telephone firmware:

Please check the handset label located under the battery cover to determine the month and year of release. If the handset has a date of 08/06 or earlier then use the "pp" upgrade program. If the date is newer than 08/06 then use the "up" upgrade program to update the telephone.

This release supports the "IP DECT 3711 Global" telephone. The Global telephone will not offer any different feature set than the current 3711 but will support both EMEA and US frequencies. To determine if a customer has a "Global" 3711 telephone press Menu, System, Version Number. The PRD: number will end with a suffix of ".int".

# 2 New Features

This release includes Windows 8 support for Contact Store (client interface).

## 3 IP Office Resolved Field Issues

In the table below, the JIRA number refers to the internal bug tracking database used by Avaya SME. When a customer field issue has been confirmed to be a product or documentation issue, it is logged in this system, and the JIRA number used internally within Avaya for tracking the resolution of this issue. There may be several customer field cases raised against a single JIRA entry.

#### 3.1 Resolved field issues in IP Office 8.1(73) and Manager 10.1(73)

The following field issues have been addressed in IP Office Core software 8.1(73) and Manager 10.1(73):

JIRA Number	Description of Issue	
IPOFFICE-39767	Call will not overflow to remote SCN hunt group if ring mode is set to Collective or Collective Call Waiting	

IPOFFICE-4335   Recording of an FNE directed call to an IP user contains silence and no "Warning" announcement is heard   IPOFFICE-42432   "Missaed call" incorrectly logged on telephone when the call is answered   IPOFFICE-42751   9611 Pickup via User key does not show caller identity prior to answering call   IPOFFICE-43088   Call History log misleading - return call to History entry shown as local user but routed externally   IPOFFICE-44133   Auto-Answer warning beep is not heard if call originates from extension based on another system in SCN   IPOFFICE-44688   Line Appearance keys not working on T3 telephones   IPOFFICE-44689   VCM channels not released - system restart required to clear   IPOFFICE-45364   IPOFFICE-45365   VCM channels not released - system restart required to clear   IPOFFICE-45365   IPOFFICE-45365   IPOFFICE-45366   IPOFFICE-45366   IPOFFICE-45366   IPOFFICE-45366   IPOFFICE-45366   IPOFFICE-45366   Intermittent remote access disconnection - ATM4 V2   IPOFFICE-45450   Intermittent remote access disconnection - ATM4 V2   IPOFFICE-45465   Intermittent remote access disconnection - ATM4 V2   IPOFFICE-45366   Intermittent provides when call is answered by Embedded VM and transferred   IPOFFICE-45366	·		
POFFICE-42751 9611 Pickup via User key does not show caller identity prior to answering call POFFICE-43098 Call History log misleading - return call to History entry shown as local user but routed externally POFFICE-44193 Auto-Answer warning beep is not heard if call originates from extension based on another system in SCN POFFICE-44193 Auto-Answer warning beep is not heard if call originates from extension based on another system in SCN POFFICE-44688 Line Appearance keys not working on T3 telephones POFFICE-44688 Line Appearance keys not working on T3 telephones POFFICE-46536 VCM channels not released - system restart required to clear POFFICE-46536 VCM channels not released - system restart required to clear POFFICE-46536 IPOFFICE-46536 POFFICE-46536 POFFICE-4	IPOFFICE-40305	Recording of an FNE directed call to an IP user contains silence and no "Warning" announcement is heard

# 3.2 Resolved field issues in Preferred Edition 8.1(9302)

The following field issues have been addressed in Preferred Edition (VoiceMail Pro) 8.1(9302):

JIRA Number	Description of Issue		
IPOFFICE-47554	Sending recordings to a broadcast group containing more than 21 users may cause VM Pro service to stop		
IPOFFICE-44887	Server Edition Voicemail Service stops every few days with Segmentation Fault		
IPOFFICE-46763	VM Campaigns - VMPro service may stop responding if caller fails to clear down before the campaign ends		
IPOFFICE-47466	Deleting users from system configuration leaves behind an empty user folder in the VM Accounts folder		

# 3.3 Customer Call Reporter 8.1.42.6 resolved field issues

The following field issues have been addressed in Customer Call Reporter 8.1.42.6:

JIRA Number	Description of Issue	
IPOFFICE-37908	CCR showing incorrect agent status	
IPOFFICE-38250	Inconsistencies with answered calls between Real Time Viewer and Call Summary Report	
IPOFFICE-40422	CCR Scheduled Reports may not print correctly	
IPOFFICE-42386	Supervisor View - Stuck call waiting indication if a transfer enquiry call is held	
IPOFFICE-44234	IP Office CCR Grade of Service discrepancies between queue Summary Report and real time monitor	
IPOFFICE-46062	CCR Agent Summary Report shows no data on Mondays	
IPOFFICE-46468	CCR Report for a specified CLI Target List includes calls without CLI	
IPOFFICE-47022	Agent Summary Report for Monday does not generate data unless include Sundays is selected	
IPOFFICE-47116	Using customer database unable to a run template "Sample Custom report Sample DDI Answer daily"	

## 3.4 one-X Portal 8.1.93(40) resolved field issues

The following field issues have been addressed in one-X Portal 8.1.93(40):

JIRA Number	Description of Issue	
IPOFFICE-31499	Wrong time in call log record in One-X Portal	
IPOFFICE-43303	Voicemail gadget displays messages associated with only one mailbox - other group messages are overwritten	
IPOFFICE-43450	one-X Portal does not display Personal Directory entry Name in the ringing state	
IPOFFICE-44864	Voicemail gadget displays "Checking Messages" for a long time after logon	
IPOFFICE-47218	Time in one-X Portal call logs incorrect by 1 hour - similar to IPOFFICE-36268	
IPOFFICE-47394	one-X Portal call log - seconds incorrectly calculated	
IPOFFICE-47473	one-X Portal does not work when installed to D drive on Windows	
IPOFFICE-49050	Client browser tab does not flash when out of focus and new IM is received or new text has been received	
IPOFFICE-45735	one-X Portal Plug-in does not work correctly with Outlook 2003 installed on German Operating System	
IPOFFICE-42286	Call Assistant does not alert the user when an incoming chat message is received	

#### 3.5 User CD 4.2(53) resolved field issues

This release of User CD contains no field related fixes.

## 3.6 Applications Server 8.1.23(4)

This release of the Applications Server consists of Preferred Edition (VoiceMail Pro) 8.1(9302) and one-X Portal 8.1.94(60). Any field related fixes in these releases will also be incorporated into this release of the Applications Server.

#### 3.7 Server Edition 8.1.99(4)

This release of IP Office Server Edition consists of IP Office core software 8.1(73), Preferred Edition (VoiceMail Pro) 8.1(9302) and one-X Portal 8.1.94(60). Any field related fixes in these releases will also be incorporated into this release of Server Edition.

## 3.8 Unified Communications Module 8.1.99(2)

This release of the Unified Communications Module software consists of Preferred Edition (VoiceMail Pro) 8.1(9302) and one-X Portal 8.1.94(60). Any fixes in these releases will also be incorporated into this release of Unified Communications Module software.

## **4 Technical Notes**

#### 4.1 Upgrading IP Office core software

When upgrading to Release 8.1 from a previous major release an upgrade licence is required. It is recommended that the IP Office Release 8.1 Software Upgrade license is installed before upgrading the system. Although the license key may not be recognized immediately by the system running an earlier major release of software, it will be recognized when the system is upgraded to Release 8.1.

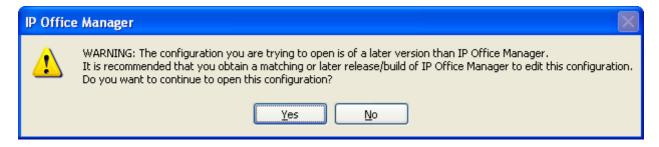

**Note**: An IP Office 8.0 system with Essential Edition functioning but not enabled with the required Essential Edition license key will have all telephony functionality disabled after the 8.1 upgrade. It is important to verify the license information prior to upgrading. If Essential Edition is not visible in the license summary, an Essential Edition license must be purchased and installed prior to attempting the 8.1 upgrade.

The table on the following page shows the necessary steps that must be taken to upgrade the IP Office system to Release 8.1:

Platform	Current Release	Upgrade Step 1	Upgrade Step 2
IP500 and IP500v2	6.0	Load 8.0	Load 8.1
All modules	6.0	Load 8.0	Load 8.1
IP500 and IP500v2	7.0/8.0	-	Load 8.1
All modules	7.0/8.0	-	Load 8.1

## **4.2 Upgrading IP Office Administration**

Earlier releases of IP Office 8.1 Manager are not compatible with systems running this release. Before upgrading an IP Office system to the 8.1(73) release, the Administration suite must also be upgraded. The following message will be displayed if attempting to access a system running the 8.1(73) release with an earlier version of Manager:

The IP Office Administration installer will detect previous installed versions and upgrade automatically. If a version earlier than 4.2 is installed, this must first be uninstalled before installing 8.1(73). It is not necessary to restart the PC after upgrading unless instructed to do so.

Before upgrading the IP Office system software ensure a backup of the system configuration exists.

### 4.3 Upgrading a remote IP500v2 System running 6.0(8) or 6.0(14) software

If the system is to be upgraded remotely and is an IP500v2 platform running 6.0(8) or 6.0(14) software please check the size of the IP Office configuration file (config.cfg) held on the system SD card **before** upgrading to this release. The config.cfg file can be found in the "Primary" folder of the System SD card. For further information please refer to "Viewing the Card Contents" in the "SD Card Management" section of the IP Office Installation Manual.

If it is determined that the IP Office configuration file stored on the System SD card has a zero byte size it is likely that the issue documented in CQ105039 has occurred. In this instance the IP500v2 system will potentially restart with a default configuration. In this instance it is recommended that the following procedure to upgrade the IP500v2 system is performed when connected to the customer's LAN:

- 1) Using Manager take a copy of the System configuration and store on the local Administration PC.
- 2) Connect to the IP Office's LAN and perform a System Restart using Manager.
- 3) When the system has restarted use Manager to send the backup of the customer's system configuration file to the IP500v2.
- 4) Restart the system and recheck the size of the IP Office configuration in the System SD card.
- 5) Upgrade the IP500v2 system to an 8.0 release.
- 6) Check for the presence of the necessary licences and then upgrade to the 8.1(73) release.

**Note:** All IP Office expansion units must also be upgraded to the version supplied with the Administration software.

#### 4.4 Upgrade Instructions for IP Office Preferred Edition

IP Office Preferred Edition (VoiceMail Pro) must be at a minimum of 7.0 GA to upgrade directly to 8.1. Previous versions must be upgraded to 7.0 before upgrading to 8.1. If running a software version older than 4.0 then please refer to IP Office Technical Bulletin 109.

The Preferred Edition 8.1(9302) installer will automatically detect the previous build and upgrade automatically. It is always advisable to back up the configuration, and any bespoke voice files prior to performing the upgrade.

Prior to upgrading the Preferred Edition Server to 8.1(9302) please ensure that all applications running on the PC are closed. The upgrade process will retain all the customer configuration, mailbox data and registry settings.

#### 4.5 Preferred Edition Recordings – Analog trunks

When using analog trunks, call disconnection can occur though busy tone detection. The system indicates to the voicemail server how much to remove from the end of a recording in order to remove the busy tone segment. This amount varies by system locale. For some systems it may be necessary to override the default if analog call recordings are being clipped or include busy tone. That can be done by adding the following NoUser Source Number and merging into the configuration:

VM\_TRUNCATE\_TIME=x

Replace "x" with the required value in the range of 0 to 7 seconds.

#### 4.6 Upgrade Instructions for Customer Call Reporter

IP Office Customer Call Reporter 8.1 supports upgrade from only the previous two major versions – 8.0 and 7.0. To upgrade earlier versions of IP Office Customer Call Reporter, you must first upgrade your setup to one of the two previous versions. The version of SQL must also be considered before upgrading. Microsoft SQL 2005 is not supported with release 8 of the Customer Call Reporter and must be upgraded to SQL 2008. Further information can be found in the "Implementing IP Office Customer Call Reporter" manual available from the IP Office Knowledgebase.

## 4.7 Upgrade instructions for IP Office one-X Portal

The IP Office one-X Portal server must be running a minimum software level of 7.0 to upgrade directly to 8.1 software. Any previous versions must be upgraded to 7.0 first before upgrading to this release.

## 4.8 Upgrade Instructions for IP Office Applications Server

This release of Applications Server has no special requirements in order to upgrade from the previous GA release. For further information please refer to the Server Maintenance section of the Application Server manual, available from the IP Office Knowledgebase.

## 4.9 Upgrade Instructions for IP Office Server Edition

This release of IP Office Server Edition has no special requirements in order to upgrade from the previous GA release. For further information please refer to the Upgrading section of the Deploying IP Office Server Edition Solution manual, available from the IP Office Knowledgebase.

## 5 Assistance

## 5.1 Documentation and Software

Documentation and Software can be downloaded from:

#### http://support.avaya.com

- 1. Select "Downloads & Documents"
- 2. Type "IP Office"
- 3. Select the required software release
- 4. Select the documentation or software categories required

Software can also be ordered on CD/DVD if required.

## **5.2 Future Service Packs**

IP Office Release 8.1 Service Pack 7 is currently scheduled for release on the 30th November 2013. For further information please see the Avaya Service Pack Schedule available from the Avaya Support web site.
