

The Power of We™

Avaya Scopia® Control

Touch Control for Scopia XT Series Systems

Avaya Scopia® Control is an Apple iPad application for control of Scopia XT series video conferencing room, telepresence, and executive desktop systems. Most end-users in business are familiar and comfortable with tablet computing and using the Apple iPad tablet in a variety of business environments. Scopia Control for the Apple iPad device brings that familiarity to room-based video conferencing to help dramatically reduce the learning curve and increase the effectiveness and adoption of video conferencing systems.

First time users can initiate calls, control their systems, and moderate meetings without any training or introduction. The integrated conference room calendar and enterprise directory makes it easy to join meetings and invite others. Video system control and meeting moderation are simple through the Apple iPad multi-touch user interface. Users can view presentations, spreadsheets, documents, and images with standards-based H.239 data collaboration, and can also review previously shared materials without interrupting the presenter using the Avaya unique advanced data collaboration / slider function.

Highlights

- Easily Join Meetings
- Control Scopia Room Systems
- Moderate Video Meetings
- View Advanced Data Collaboration
- Very Cost-Effective

Moderate Video Meetings

Manage your conference through the participants list, mute the microphone, stop the camera, or even disconnect other attendees. Easily invite other meeting participants from your corporate directory. Change the video layout and number of videos each participant views. Start or pause recording or streaming, lock the conference, extend the meeting time, or end the entire conference.

View Advanced Data Collaboration

View presentations, spreadsheets, documents, and images shared in a video conference with H.239 interoperable data collaboration. Participants can immediately review previously shared materials and catch up if they arrived late to a meeting, or spend additional time on critical points in material presented, all without interrupting the presenter.

Very Cost-Effective

Scopia Control runs on the Apple iPad tablet, leveraging its multi-touch user interface, large screen, and high resolution graphics. Utilizing the Apple iPad tablet provides a cost-effective control application that doesn't require an expensive, proprietary device. The Scopia Control app is available for free download from the Apple App Store, and will connect to any Scopia XT Series system with the appropriate license installed.

With more than 100 years as a leader in communications, Avaya can help your company maximize productivity with the communications solutions specific to the needs of your workforce.

Easily Join Meetings

Join a meeting from the integrated room calendar with a single click. Through the intuitive touch screen interface of the Apple iPad device, place calls, access your corporate directory, and previous calls with no instructions required.

Control Scopia® Room Systems

Select video sources, control local and remote PTZ cameras via far end camera control, start the presentation, and mute the Scopia® XT system microphone for privacy through the elegant Apple iPad touch screen.

Scopia Control Specifications

Meeting Initiation

Calling

- Call by IP address, E.164, H.323 name (alias) or SIP URI
- Call any user or any endpoint from the directory (local XT endpoint and corporate directory¹)
- Corporate¹ and local directory access through a simple search-based interface
- Recent calls for repeat dialing

Integrated Conference Room Calendar

- Join meetings from integrated conference room calendar¹

Endpoint Control Features

Audio/Video

- Video source selection
- PTZ (pan, tilt, zoom) of main and secondary cameras
- Set and select camera presets
- Control of near and far-end cameras
- Enable/disable picture-in-picture
- Block sending video
- Volume
- Microphone mute

Data Collaboration

- Start data collaboration from system

Privacy

- Do not disturb (block incoming calls)

Meeting Control

Moderation

- View the list of participants connected
- Mute the microphones of participants
- Stop the camera of any participant
- Disconnect a participant

Control

- Start/stop meeting recording
